A brief overview of our project

The Mental Health Tracker's primary objective is keep track of the user's happiness quotient on a regular basis.

It offers a safe space for the users to pen down their thoughts and feelings.

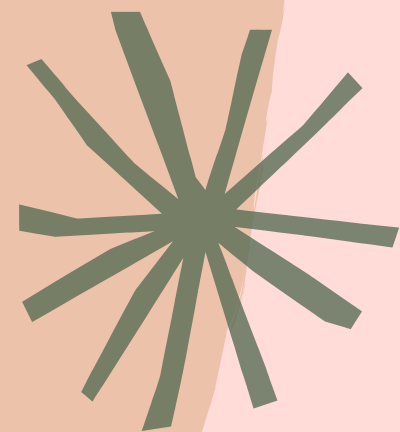

Furthermore, the user will also be able to get contact the therapist of their choosing in case they require professional assistance.

Project workflow

Features implemented in our project

Here are the key modules
available in our project

01

Happiness Tracker: Keeps track of your happiness level and provides you with daily analysis.

02

Journaling: You can maintain a record of your days. It also helps you pen down your daily goals and accomplishments.

03

Therapist Connection: Provides a forum for users to connect with the right therapist.

Tools Used

Front-end tools:

- React

Back-end tools:

- Django
- SQLite

Contribution and challenges faced

Team Member	Contributions	Challenges faced
19z328 Lavanya	Happiness Tracker front-end	Overlapping of CSS while integration
19z341 Rishika	Journaling back-end	Integration with the other apps
19z348 Sravya	Therapist connect backend and frontend	Scheduling and general integrating
19z350 Suchitha	Journaling, login, sign up, homepage front-end	problems with css when integrating
19z352 Sushmitha	Authentication, happiness tracker back-end and integration	Integration of frontend and backend
19Z357 Swaminathan	Dashboard front-end	problems with css when integrating
